

PARTNERSHIP SUCCESS

Joint Ventures Provide Opportunities to Expand Access to Care

In partnership with Southcoast Health in Massachusetts, Acadia built a 120-bed state-of-the-art behavioral health hospital offering specific programming for adolescent, adult, and geriatric patients. The new facility was at capacity by the third year of operations and a 24-bed expansion was completed in 2018, bringing the facility to the current 144-beds.

“Southcoast Health is proud to partner with Acadia Healthcare to provide inpatient behavioral healthcare services to the community. Acadia’s team has been a valuable partner and collaborator in delivering clinically excellent care at our facility in Dartmouth. We share Acadia’s mission to meet the region’s behavioral healthcare needs by offering our patients access to high-quality services.”

—Renee Clark, Executive Vice President & Chief Operating Officer, Southcoast Health
